

JUNE 2021

Dear Residents & Merchants,

Cooler Water Productions, LLC is currently in production of the upcoming HBO series titled *The Time Traveler's Wife*. The show follows Chicago librarian Henry De Tamble (played by Theo James), who suffers from a rare genetic disorder that causes him to drift uncontrollably back and forth through time. On one of his sojourns, he meets the love of his life, Clare (played by Rose Leslie), and they marry. But the problems and complexities of any relationship are multiplied by Henry's inability to remain in one time and place, so that he and his beloved are continually out of sync.
